companies

OUR EXPERTISE, YOUR INDUSTRY

Our cable and wire products are used in numerous key industries. We understand each sector's specific requirements and offer customised solutions for your projects.

In addition, Meinhart has been a strong partner to wholesalers throughout Europe for decades and is a leading supplier of cables and wires to the trade and DIY markets.

WHAT WE OFFER: CUSTOMISED SOLUTIONS FOR EVERY PROJECT

Project management

We plan your cable availability with you – so you get exactly what you need when you need it.

Europe's largest stock of cables & wires

We maintain the largest inventory of cables and wires in Europe, with more than 4000 products in stock across 330,000 m² of storage space. This means we can ensure the fastest possible availability.

Storage space for specific project requirements

We provide storage capacity for our customers for their specific projects and requirements. A service with added value

Digital services & transparency

We offer seamless tracking thanks to our digital supply chain.

Fast delivery times & flexibility

Our efficient logistics guarantees just-in-time delivery – even for large quantities and last-minute orders.

Construction site logistics & emergency stock

Perfect organisation along with dependable, coordinated availability, even in the event of an emergency.

Quality & surge voltage tests

We guarantee the highest quality with the latest precision measuring equipment. We cooperate with certified testing facilities when carrying out surge voltage tests.

Individual labelling & custom products

Solutions that exactly meet your requirements

RELIABILITY CONNECTS

Regular audits & quality assurance

We carry out regular audits of our manufacturers to ensure that you always receive the best quality.

Special products for special requirements

Our range includes customised solutions that are precisely tailored to your project requirements. We cater to your needs and special requests.

Own vehicle fleet with cranes & trained personnel

Our in-house haulage department with its own fleet of vehicles takes care of on-time delivery. Our lorries are all equipped with cranes. Staff undergo regular training and professional development to expert level.

Emergency & blackout stock

We offer special storage capacities for crisis situations to ensure a continuous supply.

Minimised transportation risk

Transshipment is kept to an absolute minimum along the entire supply chain, ensuring your cables arrive safely and without damage.

TOGETHER INTO THE FUTURE

with innovative technologies

At Meinhart, we have set ourselves the goal of becoming carbon neutral by 2030. We deploy innovative technologies and digital solutions, working with you to shape the future of cable and wire projects. We can offer you maximum efficiency thanks to our digital services and transparent supply chain.

QUALITY COUNTS

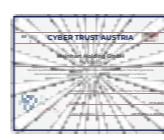

Our high standards of quality and service have been confirmed by numerous certifications and awards.

Certifications:
