

EASYSKIN & EASYTWIST

FAST,

CLEAN AND
EFFICIENT.

NEW! 

MEINHART
Cables Connect.

easy-Line

A new generation of cables

Our new easy line of insulated and sheathed wires with the highest product quality guarantees an optimum workflow for fast, clean and efficient installation. As the industry leader in cable distribution and logistics, we set the standards in electrical installation when it comes to **Innovation, quality and efficiency.**

Time saving

With their excellent properties, our products ensure **fast, clean installation** in a lot less time.

Efficiency

Easy handling and improved materials increase work efficiency.

Cost savings

The time and labour savings and the optimised use of resources mean a significant **reduction in costs.**

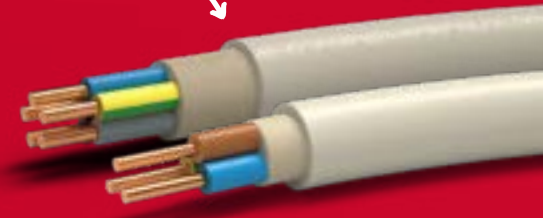

Quality

Our products are made of **robust, durable materials** and meet the highest quality

easySkin

Fast and clean stripping

NYM-sheathed wires

The new **easySkin** NYM sheathed wires allow cables to be **stripped cleanly and quickly** for at least **1 meter in one go** without leaving any residue or dirt. Less cleaning work is required and stripping is significantly faster. The simple handling means both **cost and time savings.**

The robust and durable wires are available in various cross-sections.

easySkin: DIN EN 60228 Class 1, DIN VDE 0250-204

easyTwist

FOR time savings installations

Twisted insulated wires

With our new **easyTwist** insulated wires, electrical installation is fast and simple, while resource use is minimised. Thanks to the twisted design and smooth surface, the cables **can be pulled in effortlessly** by just one person. **easyTwist** insulated wires are robust, durable and available in various combinations and cross-sections depending on the area of applica-

easyTwist: DIN EN 60228 Class 1, DIN VDE 0285-525-2-31
