

## SL 808C

## Incremental Transmission Cable with Copper Screening and PVC Outer Sheath

### Application:

These cables are used as highly flexible connection cables in speedometers, brakes and pulse generators in machine and plant engineering for medium-level mechanical stress in dry, damp and wet locations. These two types show different characteristics in relation to the steering of servomotors. The motor feedback cable is used to regulate motor speed and indicate actual values. The incremental transmission cable controls positioning and processing.

### Construction:

- 1 ..... fine-stranded bare copper
- 2 ..... core insulation of polyethylene (PE)
- 3 ..... banding of plastic-concealed Al-foil and braided shield
- 4 ..... screen of tinned copper braiding
- 5 ..... outer sheath of polyvinylchloride (PVC)

### Standards:

in according with DIN 0285-525-1, 0812  
 DIN EN 60228 class 5 (construction)  
 in according with DIN 47100 (core identification)
